

## Company profile | 2021

Nature  
knows  
best.

*"Let thy food be thy medicine  
and thy medicine be thy food"*  
Hippocrates

# Intuition begets vision

## ROOTS

In 1992, **APA-CT** was created by a team of expert veterinarians and conscientious breeders driven by a common goal: **veterinary phytotherapy for animal health and well-being**. Over the years, this intuition set strong roots, growing into the vigorous company it is today.

**Our goal** is to tap into Nature's resources, limiting use of conventional, synthetic molecules, and providing **high-quality products for animals** which drastically **reduce the risk of chemical residues** in our food chain.

## SHOOTS

# Research becomes development

In 2004, the **GreenVet** brand was launched: a full line of **nutritive products and topical use products containing herbal components and essential oils**, developed to meet the needs of animal caretakers, from farmers to families, for **production animals** and **pets**.

Animal well-being is the result of daily care and living conditions: through our specific herbal blends, **GreenVet** seeks to encourage the responsible management of animal well-being.

# Nature fosters well-being

## FRUIT

Almost 30 years later, our company's vitality continues to grow, nurtured by our **passion, love for animals, respect of the environment** and **scientific approach** which includes research and field studies.

Today, we are dedicated to **reducing indiscriminate use of antibiotics** in farming, as a key component in the fight to **minimize risks from antibiotic resistance**.

Natural  
synergy

Our best  
ingredients

In collaboration with international Universities, Institutes and Research Centers and through participation in numerous field trials and studies on animal nutrition, the excellent results obtained both nationally and internationally have aided in the development of **innovative products with limited environmental impact.**

**GreenVet** offers a wide variety of nutritive products: liquid, powdered and microencapsulated **complementary feed** for dietary integration, as well as **products for topical use:** in liquid, powdered and gel form. Our products contain specific **herbal blends and essential oils** which may support normal bodily functions in promoting maintenance of natural defenses. Our goal: the **well-being** of pets and production animals.

Our on-site production areas are dedicated to the manufacture of **topical use products**, feed products and a specialty line of **feed products** specifically for **fish.**

Our manufacturing process begins with the **selection of raw materials** and continues through various production phases in creating our finished products. Our on-site logistics area manages product distribution worldwide with express transport and delivery options to meet customer needs.

The knowledge and experience of **veterinarians, breeders, technicians and consultants** has lead to excellent results in our field, the most recent being our **FAMI-QS** certification obtained in 2020.

**FAMI**<sup>®</sup>**QS**

LIVESTOCK

# Farm with Nature

The **GreenVet product line for livestock** including **cattle, sheep and goats** contains feed products and topical use products. Formulated with high-quality raw materials including botanicals, herbal blends, extracts and essential oils, our goal is **to aid farming environments in reducing indiscriminate use of antibiotics in food-producing animals.**

**GreenVet** also offers products for topical application and use in housing areas, designed **to aid farmers** in the responsible management of livestock in their farming environment.

## Hygiene

**GreenVet topical use products are emollient, cleansing products** available in multiple packaging solutions, formulated to respect the skin's natural physiology and a beautiful, healthy coat. Liquid products are available in ready to use spray bottles, cream and gel products are ideal for direct cutaneous application.

## Nutrition

**GreenVet complementary feed products** are for addition to livestock's complete dietary ration and can be added to drinking water, milk replacer or the feed ration. They are available in multiple packaging sizes: bottles, jars, bags and sacks in both liquid and powdered form.

SWINE

# Grow with Nature

**GreenVet** has a wide range of products for the **well-being of swine**. Raw materials are carefully selected with the health and well-being of swine in mind, as well as our own. In fact, GreenVet supports farmers in **reducing indiscriminate use of antibiotics in food-producing animals**.

## Hygiene

**GreenVet topical use products for swine** are available in multiple packaging solutions, formulated to respect the skin's natural health and physiology. Liquid products are available in ready to use spray bottles, cream and gel products are ideal for direct cutaneous application.

## Nutrition

**GreenVet complementary feed** products are for addition to the complete dietary ration and can be added to drinking water, milk replacer or the feed ration. They are available in multiple packaging sizes: bottles, jars, bags and sacks in both liquid and powdered form.

POULTRY AND GAME-BIRDS

# Barnyard well-being

**GreenVet leads the field** in both small rural farms and large industrial groups. Our product line for poultry and game-birds contains high-quality raw materials including botanicals, herbal blends, extracts and essential oils.

**Our goal is to aid farming environments in reducing indiscriminate use of antibiotics** in food-producing animals through mindful animal nutrition.

## Hygiene

**GreenVet topical use products** for poultry and game-birds are emollient, cleansing products available in multiple packaging solutions, formulated to respect the skin's natural physiology and beautiful, healthy plumage. Liquid products are available in ready to use spray bottles, cream and gel products are ideal for direct cutaneous application.

## Nutrition

**Nutrition first. GreenVet** complementary feed products for poultry and game-birds for addition to drinking water or the feed ration are available in multiple packaging sizes: bottles, jars, bags and sacks in both liquid, powdered and microencapsulated form.

FEED MILLS

# Well-being in industrial production

**GreenVet complementary feed and premixtures** containing botanicals, herbal blends, extracts and essential oils are ideal for use by feed mills for the manufacture of feed solutions for all production animals, including **poultry and game-birds, cattle, rabbits, horses, sheep and goats, and swine.** **GreenVet** nutritional products are for addition to a complete dietary ration and are available in multiple packaging sizes for industrial feed mills and on-site farm mixing.

*Farming has become an industrial process*

GreenVet nutritional products are designed for use by feed mills and farmers as part of the very special human-animal bond.

We put the knowledge gained in 30 years of study and field research on animal well-being in your hands, for the proper nutrition of production animals and in the event you require technical assistance.

FISH FARMING *fish*

# Farm with Nature

**GreenVet** products are ideal for use in all species of farmed freshwater fish. Herbal blends and essential oils are the basis of **GreenVet** complementary feed and topical use products suggested for maintaining the natural state of health and well-being of **freshwater fish species farmed in intensive or extensive conditions as food-producing animals or for rearing of trout, rainbow trout and sturgeons.**

*Responsible farming today is necessary for a healthy tomorrow.*

*GreenVet supports farmers and caretakers for the well-being of farmed fish and their production environment, while reducing indiscriminate use of antibiotics to minimize risks from antibiotic resistance.*

Proper nutrition is fundamental to the growth, development and maintenance of the state of health and well-being of farmed fish. GreenVet nutritional products are designed for addition to the complete dietary ration and are available in multiple packaging sizes for addition to tank water or feed. Topical use products provide farmers with practical, sustainable means to take care of fish and the farming environment.

RABBIT FARMING

# Hop into Nature

**GreenVet products for farmed rabbits** contain herbal blends specifically designed for nutrition and hygiene in rabbit farming. **GreenVet's** goal is to support animal **well-being** while supporting farmers in reducing indiscriminate use of synthetic chemical products, a win-win situation for production animals and the environment.

## Hygiene

**GreenVet topical use products for farmed rabbits are emollient, cleansing products** available in multiple packaging solutions and respect the skin's natural physiology. Liquid products are available in ready to use spray bottles, cream and gel products are ideal for direct cutaneous application.

## Nutrition

NEW

Growing  
by Nature:  
respect,  
sustainability,  
efficacy,  
awareness.

The environmental consequences of modern progress lead us to due reflection on alternative solutions in every aspect of our daily lives.

**GreenCulture** springs from this awareness: a line of innovative blends for use in the home flower and vegetable garden, orchard and field containing herbal components, natural extracts and essential oils. Products which reduce environmental impact: Nature caring for Nature.

**GreenCulture** grows on the strong base offered by **GreenVet**: leading international brand dedicated to veterinary phytotherapy with 30 years of field experience.

With the highest attention to quality raw materials, vast knowledge of phytotherapy, and careful control of all production phases we present **GreenCulture**.
